## Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Acting in accordance with European Union legislation, we as a manufacturer of electronic equipment, confirm that our products comply with the requirements regarding EU Regulation 1907/2006/EC concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

Substances fulfilling one or more of the criteria defined in Article 57 of REACH are identified as "Substances of very high concern (SVHC)" and placed on the "Candidate List of substances subject to authorization."

The SVHC candidate list (<https://echa.europa.eu/candidate-list-table>), contains over 200 substances which we as manufacturer notify.

Under regulation 7(2), EU and EEA manufacturers or importers must notify ECHA if their article contains a substance on the SVHC list. This obligation applies if the substance is present in those articles in quantities totalling more than 1 t/year per producer or importer and if the substance is present in those articles in a concentration of more than 0.1% (w/w).

According to Article 33 of REACH, any supplier of an article containing SVHC in a concentration above 0.1% weight by weight (w/w) shall provide the consumer with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

We confirm that all our notifications have been properly carried out. Our products are under continuous inspection.

Yours sincerely,
